UDACITY
Responsive Web Design Fundamentals, Object-Oriented JavaScript, JavaScript Basics, Intro to jQuery, HTML5 Canvas, Technical Interview

ABOUT

ENGLISH TEACHER AND ENTREPRENEUR (SOUTH KOREA)   **Nov 2010 – Sep 2017**

For the last seven years I have been living and working in Seoul Korea primarily as an English teacher. I started learning about web development building a website for a business I co-founded. After exploring ways to automate the process of connecting students with teachers online, I began to pursue software engineering as a career path.

Nate and Julia - Afterschool program   Co-founded an English course that served over 40 local kids
Chugye University for the Arts Seoul   Promoted from a position located in a suburb to a highly coveted location in Seoul
Gaby - Skype English Lessons   Created an online service connecting Korean students with teachers in the Philippines
